Retirement Board
City of St. Clair Shores Police and
Fire Retirement System
27600 Jefferson Circle Drive
St. Clair Shores, Michigan 48081-9971

**Re: City of St. Clair Shores Police and Fire Retirement System Valuation as of June 30, 2016
Actuarial Disclosures**

Dear Board Members:

The results of the June 30, 2016 Annual Actuarial Valuation of the City of St. Clair Shores Police and Fire Retirement System, which is based upon Act 345 of the Public Acts of 1937, as amended, are presented in this report.

This report was prepared at the request of the Board and is intended for use by the Retirement System and those designated or approved by the Board. This report may be provided to parties other than the System only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The purposes of the valuation are to measure the System's funding progress as of June 30, 2016, and to determine the employer contribution rate for the fiscal year ending June 30, 2018. This report should not be relied on for any purpose other than the purposes described herein. Determinations of financial results, associated with the benefits described in this report, for purposes other than those identified above, may be significantly different.

The findings in this report are based on data and other information through June 30, 2016. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period, or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. The scope of an actuarial valuation does not include an analysis of the potential range of such future measurements.

This valuation assumed the continuing ability of the plan sponsor to make the contributions necessary to fund this plan. A determination regarding whether or not the plan sponsor is actually able to do so is outside our scope of expertise and was not performed.

The valuation was based upon information furnished by the Plan Administrator, concerning Retirement System benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked for internal reasonability and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by the Plan Administrator.

In addition, this report was prepared using certain assumptions approved by the Board as described in the section of this report entitled Valuation Methods and Assumptions.

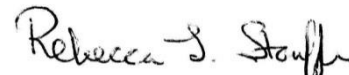

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. To the best of our knowledge the information contained in this report is accurate and fairly presents the actuarial position of the City of St. Clair Shores Police and Fire Retirement System as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices and the Actuarial Standards of Practice issued by the Actuarial Standards Board.

Gabriel, Roeder, Smith & Company will be pleased to review this valuation report with the Board of Trustees and answer any questions pertaining to the valuation. Rebecca L. Stouffer and Mark Buis are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

The signing actuaries are independent of the plan sponsor.

Respectfully submitted,

GABRIEL, ROEDER, SMITH & COMPANY

Rebecca L. Stouffer, ASA, MAAA

Mark Buis, FSA, FCA, EA, MAAA

RLS/MB:ah

SECTION A
VALUATION RESULTS

FUNDING OBJECTIVE

The funding objective of the Retirement System is to establish and receive contributions, expressed as percents of active member payroll, which will remain approximately level from year-to-year and will not have to be increased for future generations of citizens.

CONTRIBUTION RATES

The Retirement System is supported by member contributions, City's contributions and investment income from Retirement System assets.

Contributions which satisfy the funding objective are determined by the annual actuarial valuation and are sufficient to:

- (1) cover the actuarial costs allocated to the current year by the actuarial cost methods described in Section C (the normal cost); and
- (2) finance over a period of future years the actuarial cost not covered by present assets and anticipated future normal costs (unfunded actuarial accrued liability).

Contribution requirements for the fiscal year beginning July 1, 2017 are shown on page A-2.

The Board of Trustees of the City of St. Clair Shores Police and Fire Retirement System confirms that the System provides for payment of the required employer contribution as described in Section 20m of Michigan Public Act No. 728.

CITY'S COMPUTED CONTRIBUTIONS

Valuation Date June 30	Contributions Expressed as Percents of Annual Pay	
Contributions for Fiscal Year Beginning July 1	2016	2015
	2017	2016
NORMAL COST		
Age and service pensions	20.74%	21.11%
Death before retirement pensions	0.39%	0.34%
Disability pensions	0.91%	0.96%
Total	22.04%	22.41%
MEMBERS' CONTRIBUTIONS		
Gross contributions*	4.61%	4.61%
Less prospective refunds	0.26%	0.26%
Available for pensions	4.35%	4.35%
CITY'S NORMAL COST	17.69%	18.06%
AMORTIZATION UNFUNDED ACTUARIAL ACCRUED LIABILITIES#	31.59%	30.18%
TOTAL CITY CONTRIBUTIONS@ - %	49.28%	48.24%
- \$	\$5,898,688	\$5,603,001

* *Weighted average.*

Unfunded accrued liabilities were amortized as a level percent of payroll over a period of 23 years (24 years for the fiscal year beginning July 1, 2016).

@ *All fiscal year calculations are based on the valuation payroll of \$10,961,050 for the period July 1, 2015 - June 30, 2016, assumed to increase at a rate of 4.5% each year. No adjustments have been made to reflect agreements which may limit pay increases over the next year. To the extent that actual pays are less (greater) than projected, application of the rate shown will produce dollar contributions less than (greater than) the amount illustrated above. Any shortfall (excess) will manifest as an increase (decrease) in future contribution rates.*

Overall contribution rates increased slightly from last year. Normal cost rates decreased primarily due to demographic changes, while the amortization of unfunded liability increased primarily due to unfavorable asset returns over the last five years.

DETERMINATION OF UNFUNDED ACTUARIAL ACCRUED LIABILITY

	June 30,	
	2016	2015
A. Accrued Liability		
1. For retirees and beneficiaries	\$ 108,000,994	\$ 105,988,711
2. For vested terminated members	767,954	429,827
3. For present active members		
a. Value of expected future benefit payments	73,309,299	71,094,556
b. Value of future normal costs	21,804,934	21,799,247
c. Active member accrued liability: (a) - (b)	51,504,365	49,295,309
4. Total accrued liability	160,273,313	155,713,847
B. Present Assets (Funding Value)	98,726,449	96,946,709
C. Unfunded Accrued Liability: (A.4) - (B)	61,546,864	58,767,138
D. Funding Ratio: (B) / (A.4)	61.6%	62.3%
E. Funding Ratio: Market Value Basis	60.2%	64.0%

DEVELOPMENT OF FUNDING VALUE OF ASSETS

Year Ended June 30:	2015	2016	2017	2018	2019	2020
A. Funding Value Beginning of Year	\$ 92,913,702	\$ 96,946,709				
B. Market Value End of Year	99,696,472	96,480,489				
C. Market Value Beginning of Year	101,022,075	99,696,472				
D. Non-Investment Net Cash Flow	(4,575,259)	(4,352,967)				
E. Investment Income						
E1. Market Total: B - C - D	3,249,656	1,136,984				
E2. Amount for Immediate Recognition (7.5%)	6,796,955	7,107,767				
E3. Amount for Phased-In Recognition: E1-E2	(3,547,299)	(5,970,783)				
F. Phased-In Recognition of Investment Income						
F1. Current Year: 0.20 x E3	(709,460)	(1,194,157)				
F2. First Prior Year	2,013,998	(709,460)	\$ (1,194,157)			
F3. Second Prior Year	631,047	2,013,998	(709,460)	\$ (1,194,157)		
F4. Third Prior Year	(1,716,488)	631,047	2,013,998	(709,460)	\$ (1,194,157)	
F5. Fourth Prior Year	1,592,214	(1,716,488)	631,047	2,014,000	(709,459)	\$(1,194,155)
F6. Total Recognized Investment Gain(Loss)	1,811,311	(975,060)	741,428	110,383	(1,903,616)	(1,194,155)
G. Funding Value End of Year: A + D + E2 + F5	96,946,709	98,726,449				
H. Difference between Market & Funding Value	2,749,763	(2,245,960)				
I. Recognized Rate of Return - Funding Value	9.50%	6.47%				
J. Recognized Rate of Return - Market Value	3.29%	1.17%				

The Funding Value of Assets recognizes assumed investment income (line E2) fully each year. Differences between actual and assumed investment income (line E3) are phased-in over a closed 5-year period. During periods when investment performance exceeds the assumed rate, Funding Value of Assets will tend to be less than market value. During periods when investment performance is less than the assumed rate, Funding Value of Assets will tend to be greater than market value. The Funding Value of Assets is unbiased with respect to Market Value. At any time it may be either greater or less than Market Value. If actual and assumed rates of investment income are exactly equal for 4 consecutive years, the Funding Value will become equal to Market Value.

DERIVATION OF EXPERIENCE GAIN (LOSS)

Actual experience will never (except by coincidence) coincide exactly with assumed experience. It is hoped that gains and losses will cancel each other over a period of years, but sizable year-to-year fluctuations are common. Detail on the derivation of the experience gain (loss) is shown below, along with a year-by-year comparative schedule.

(1) UAAL* at start of year	\$ 58,767,138
(2) Total normal cost	2,519,699
(3) Actual contributions for pensions	5,932,128
(4) Interest accrual	4,279,569
(5) Expected UAAL* before changes	59,634,278
(6) Change from amendments	0
(7) Change in asset smoothing methodology	0
(8) Change from assumption and actuarial cost method revisions	0
(9) Expected UAAL* after changes	59,634,278
(10) Actual UAAL*	61,546,864
(11) Gain (loss) (9) - (10)	(1,912,586)
(12) Gain (loss) as percent of actuarial accrued liabilities at start of year (\$155,713,847)	(1.2)%

* *Unfunded actuarial accrued liabilities.*

Valuation Date	Experience Gain (Loss) as % of Beginning Accrued Liability
6-30-07	2.6 %
6-30-08	(3.0)
6-30-09	(7.5)
6-30-10	(1.0)
6-30-11	(6.4)
6-30-12	(8.0)
6-30-13	(4.4)
6-30-14	0.7
6-30-15	0.6
6-30-16	(1.2)

VALUATION ASSETS AND UNFUNDED ACTUARIAL ACCRUED LIABILITY

In financing the actuarial accrued liabilities, the valuation assets of \$98,726,449 were distributed as shown below.

Reserves for	Present Valuation Assets Applied to			Totals
	Member Actuarial Accrued Liability	Retired Life Actuarial Liabilities	Contingency Reserve	
Employees' Contributions	\$ 5,495,187			\$ 5,495,187
Employer Contributions	(15,894,309)	\$22,281,906		6,387,597
Retired Benefit Payments		85,719,088		85,719,088
Excess Earnings Reserve	1,124,577			1,124,577
Totals	\$ (9,274,545)	\$108,000,994	none	\$98,726,449

Assets were applied against actuarial accrued liabilities in determining unfunded actuarial accrued liabilities as follows:

	Retired Lives	Active Members	Total
Computed Actuarial Accrued Liabilities	\$108,000,994	\$52,272,319	\$160,273,313
Applied Assets	108,000,994	(9,274,545)	98,726,449
Unfunded Actuarial Accrued Liabilities	\$ none	\$61,546,864	\$ 61,546,864

* Revised actuarial assumptions and/or methods.

Retirement System amended.

@ Excluding contributions for Health Insurance and Medicare premiums after valuation date 12-31-86.

The ratio of Valuation Assets to Actuarial Accrued Liabilities is a traditional measure of a system's funding progress. Except in years when the system is amended or actuarial assumptions are revised, this ratio can be expected to increase gradually toward 100%.

The Ratio of Unfunded Actuarial Accrued Liabilities to Valuation Payroll is another relative index of condition. Actuarial unfunded liabilities represent debt, while active member payroll represents the system's capacity to collect contributions to pay toward debt. The lower the ratio, the greater the financial strength and vice-versa.

COMMENTS

ACTUARIAL EXPERIENCE: The System encountered less favorable actuarial experience than expected for the valuation year resulting in an experience loss of \$1,912,586. The loss was primarily attributable to recognized investment income that was less than assumed, with additional losses from more retirements and fewer deaths than expected. The overall experience loss increased the required contribution for the year beginning July 1, 2017 from what it otherwise would have been.

As of June 30, 2016 there are \$2.2 million of unrecognized investment losses that will be gradually recognized over the next four years. Recognition of these losses will put upward pressure on required contributions over the next several years.

PLAN AMENDMENTS: There were no changes to plan provisions since the previous valuation.

ACTUARIAL METHODS AND ASSUMPTIONS: There were no changes to the actuarial methods and assumptions since the previous valuation.

LOOKING AHEAD: The 7.5% assumed rate of return is at the upper end of our reasonable range of return assumptions. We will monitor the use of this assumption, and may need to recommend lowering of this assumption in future valuation years.

RECOMMENDATION: We recommend consideration be given to lowering the wage inflation (to 3.5%), to better align with historical experience and our expectations for the future. Additionally, this assumption change helps maintain a reasonable spread between inflation and return assumptions. A more detailed discussion of this recommendation is available in our report "Review of System Experience" dated July 20, 2015.

CERTIFICATION: To the best of our knowledge and belief, the valuation is complete and accurate and was made in accordance with generally recognized actuarial methods. The actuarial assumptions summarized in Section C are in the aggregate a reasonable representation of the past and anticipated future experience of the System.

COMMENTS (CONTINUED)

ACTUARIAL DISCLOSURE: The computed contribution rate shown on A-2 may be considered as a minimum contribution rate that complies with the Board's funding objective. Users of this report should be aware that contributions made at that rate do not guarantee benefit security. Given the importance of benefit security to any retirement system, we suggest that contributions to the System in excess of those presented in this report be considered.

The contribution rate in this report is determined using the actuarial assumptions and methods disclosed in Section C of this report. This report includes risk metrics on page A-7 but does not include a more robust assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment. We encourage a review and assessment of investment and other significant risks that may have a material effect on the plan's financial condition.

COMMENTS (CONCLUDED)

OTHER OBSERVATIONS:

General Implications of Contribution Allocation Procedure or Funding Policy on Future Expected Plan Contributions and Funded Status

Given the plan's contribution allocation procedure, if all actuarial assumptions are met (including the assumption of the plan earning 7.5% on the actuarial value of assets), it is expected that:

- 1) employer normal cost amounts as a percentage of payroll will remain approximately level year- to-year;
- 2) the unfunded actuarial accrued liability will be fully amortized after 23 years; and
- 3) the funded status of the plan will increase gradually towards a 100% funded ratio.

Limitations of Funded Status Measurements

Unless otherwise indicated, a funded status measurement presented in this report is based upon the actuarial accrued liability and the actuarial value of assets. Unless otherwise indicated, with regards to any funded status measurements presented in this report:

- 1) The measurement is inappropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations.
- 2) The measurement is inappropriate for assessing the need for or the amount of future employer contributions.
- 3) The measurement would produce a different result if the market value of assets were used instead of the actuarial value of assets, unless the market value of assets is used in the measurement.
- 4) The funding level of the plan on a Market Value basis is shown on page A-3.

SECTION B
VALUATION DATA

BRIEF SUMMARY OF ACT 345 BENEFIT PROVISIONS (JUNE 30, 2016)

SERVICE RETIREMENT

The benefit amounts attributable to regular retirements and the conditions under which such benefits may be paid are described in tabular form on page B-2.

DEFERRED RETIREMENT

Eligibility - 10 or more years of service, payable to member or eligible surviving spouse.

Annual Amount - Computed as service retirement but based upon service, FAC and benefit in effect at termination. Benefit begins at date retirement would have occurred had member remained in employment. Benefit to eligible surviving spouse actuarially reduced in accordance with an Option I election.

DEATH AFTER RETIREMENT SURVIVOR'S PENSION

Eligibility - Payable to a surviving spouse, if any, upon the death of a retired member who is receiving a regular straight life pension.

Annual Amount - Spouse's pension equals 60% of the regular straight life pension the deceased retiree was receiving.

NON-DUTY DEATH-IN-SERVICE SURVIVOR'S PENSIONS

Eligibility - Payable to a surviving spouse, if any, upon the death of a member with 10 or more years of service.

Annual Amount - Accrued straight life pension actuarially reduced in accordance with an Option I election.

DUTY DEATH-IN-SERVICE SURVIVOR'S PENSIONS

Eligibility - Payable upon the expiration of worker's compensation to the survivors of a member who died in the line of duty.

Annual Amount - Same amount that was paid by worker's compensation.

NON-DUTY DISABILITY

Eligibility - Payable upon the total and permanent disability of a member with 5 or more years of service.

Annual Amount - To age 55: 1.5% of FAC times years of service. At age 55: Computed like Service Retirement Pension.

DUTY DISABILITY

Eligibility - Payable upon the total and permanent disability of a member in the line of duty.

Annual Amount - To Age 55: 50% of FAC. At Age 55: Computed like Service Retirement Pension with service credit from date of disability to age 55.

BRIEF SUMMARY OF ACT 345 BENEFIT PROVISIONS - (CONCLUDED) (JUNE 30, 2016)

Group	Eligibility				Benefit Formula				FAC Years (Final Average Compensation)	Maximum Benefit (% of FAC)	Base Wages	Member Contribution Rate	Annuity Withdrawal

SECTION C

VALUATION METHODS AND ASSUMPTIONS

ACTUARIAL COST METHOD

Normal cost and the allocation of benefit values between service rendered before and after the valuation date were determined using an individual entry-age normal cost method having the following characteristics:

- The annual normal costs for each individual active member, payable from the date of employment to the date of retirement, are sufficient to accumulate the value of the portion of the member's benefit at the time of retirement, death or disability.
- Each annual normal cost is a constant percentage of the member's year-by-year projected covered pay.

Unfunded actuarial accrued liabilities were amortized by level (principal and interest combined) percent-of-payroll contributions over a period of 23 years and added to the computed normal cost contribution. Assets in excess of actuarial accrued liabilities were amortized by level (principal & interest combined) percent-of-payroll contributions over a period of 10 years and applied as a credit to the computed normal cost contribution. This unfunded actuarial accrued liability payment reflects any payments expected to be made between the valuation date and the date contributions determined by this report are scheduled to begin.

The valuation assets used for funding purposes is derived as follows: prior year valuation assets are increased by contribution and expected investment income and reduced by refunds, benefit payments and expenses. To this amount is added 20% of the difference between expected and actual investment income for each of the previous five years. During periods when investment performance exceeds the assumed rate, actuarial value of assets will tend to be less than market value. During periods when investment performance is less than the assumed rate, actuarial value of assets will tend to be greater than market value.

Excess Earnings Reserve. An amount equal to the market value of the Excess Earnings Reserve is added to the liabilities to assure proper allocation of assets to liabilities.

ACTUARIAL ASSUMPTIONS USED FOR THE VALUATION

The contribution requirements and benefit values of the System are calculated by applying actuarial assumptions to the benefit provisions and people information furnished, using the actuarial cost method described on the previous page.

The principal areas of financial risk which require assumptions about future experiences are:

- long-term rates of investment return to be generated by the assets of the System
- patterns of pay increases to members
- rates of mortality among members, retirants and beneficiaries
- rates of withdrawal of active members (without entitlement to a retirement benefit)
- rates of disability among members
- the age patterns of actual retirements

The monetary effect of each assumption is calculated for as long as a present covered person survives - - - a period of time which can be as long as a century.

Actual experience of the System will not coincide exactly with assumed experience. Each valuation provides a complete recalculation of assumed future experience and takes into account all past differences between assumed and actual experience. The result is a continual series of adjustments (usually small) to the computed contribution rate.

From time-to-time it becomes appropriate to modify one or more of the assumptions, to reflect experience trends (but not random year-to-year fluctuations).

The actuarial assumptions are based upon experience studies dated September 18, 2008 and July 20, 2015.

VALUATION ASSUMPTIONS

The rate of investment return was 7.5% (net of expenses) a year, compounded annually. This assumption is used to make money payable at one point in time equal in value to an amount of money payable at another point in time. The assumed real rate of return (the net return in excess of the wage inflation rate) was 3.0%. Economic experience during the last 5 years has been as follows:

	Year Ending					5-Year Average
	6/30/16	6/30/15	6/30/14	6/30/13	6/30/12	
1) Nominal rate of return#	6.5%	9.5%	10.8%	0.3%	0.2%	5.4%

- funding purposes	(0.1)	3.5	4.1	(4.1)	2.2	1.1%
- assumption	3.0	3.0	3.0	3.0	3.0	3.0%

The nominal rate of return was computed using the approximate formula: $i = I$ divided by $1/2 (A+B-I)$, where I is realized investment income net of expenses, A is the beginning of year asset value and B is the end of year asset value.

* Based on members who were active both at the beginning and end of the year.

A price inflation of approximately 2.75% was assumed. This assumption is not explicitly utilized in the calculation of valuation results.

The rates of salary increase used for individual members are in accordance with the following table. This assumption is used to project a member's current salary to the salaries upon which benefit amounts will be based.

SAMPLE SALARY ADJUSTMENT FACTORS USED TO PROJECT CURRENT SALARIES

Sample Ages	Percent Increase in Salary During Next Year	
	Base	Promotion & Seniority
20	4.5 %	3.0 %
25	4.5	3.0
30	4.5	2.6
35	4.5	1.1
40	4.5	0.2
45	4.5	0.2
50	4.5	0.2
55	4.5	0.1
60	4.5	0.0

If the number of active members remains constant, then the total active member payroll will increase 4.5% annually, the base portion of the individual salary increase assumptions. The base salary increase assumption of 4.5% was first used for the June 30, 1999 valuation.

VALUATION ASSUMPTIONS (CONTINUED)

The mortality rates utilized are based upon the RP-2014 tables, as extended, and include a margin for future mortality improvements projected using a fully generational improvement scale. The tables used were as follows:

Post-Retirement Mortality: The RP-2014 Healthy Annuitant Generational Mortality Tables, with blue collar adjustments and extended via cubic spline. This table is adjusted backwards to 2006 with the MP-2014 scale. A base year of 2006 with future mortality improvements assumed each year using scale MP-2015.

Pre-Retirement Mortality: RP-2014 Employee Generational Mortality Tables, with blue collar adjustments and extended via cubic spline. This table is adjusted backwards to 2006 with the MP-2014 scale. A base year of 2006 with future mortality improvements assumed each year using scale MP-2015.

Post-Retirement Disabled Mortality: The RP-2014 Disabled Mortality Tables, extended via cubic spline. This table is adjusted backwards to 2006 with the MP-2014 scale. A base year of 2006 with future mortality improvements assumed each year using scale MP-2015.

These tables were first used for the June 30, 2015 valuation. Sample values for Post-Retirement Mortality follow:

Single Life Retirement Values				
Sample Ages	Present Value of		Future Life	
	\$1 Monthly for Life*		Expectancy (Years)*	
	Men	Women	Men	Women
45	\$149.20	\$152.39	38.93	42.03
50	143.56	147.69	33.91	36.94
55	136.56	141.75	29.10	32.02
60	127.98	134.21	24.54	27.28
65	117.35	124.51	20.21	22.70
70	104.46	112.33	16.15	18.34
75	89.64	97.96	12.47	14.34
80	73.71	82.00	9.28	10.82

* Based on retirements in 2016. Retirements in future years will reflect improvements in life expectancy.

This assumption is used to measure the probabilities of members dying before retirement and the probabilities of each benefit payment being made after retirement. For purposes of the valuation, we assume that 75% of deaths in service are duty related and 25% of deaths in service are non-duty related.

VALUATION ASSUMPTIONS (CONTINUED)

The rates of retirement used to measure the probabilities of eligible members retiring during the next year were as follows:

Retirement Ages	All Others Percent of Active Members Retiring within Next Year	Fire Hired After 1/1/2010 Percent of Active Members Retiring within Next Year
45	30 %	
46	30	
47	30	
48	30	
49	30	
50	30	50 %
51	30	30
52	40	40
53	40	40
54	40	40
55	40	40
56	50	50
57	50	50
58	50	50
59	50	50
60	100	100

A member is eligible for retirement after 25 or more years of service, or after attaining age 60 with 10 years of service. Fire members hired after 1/1/2010 are eligible for retirement after attaining age 50 with 25 years of service, or after attaining age 60 with 10 years of service.

VALUATION ASSUMPTIONS (CONCLUDED)

Rates of separation from active membership were as shown below (rates do not apply to members eligible to retire and do not include separation on account of death or disability). This assumption measures the probabilities of members remaining in employment.

Sample Ages	Years of Service	% of Active Members Separating within Next Year
ALL	0	10.00 %
	1	7.00
	2	5.00
	3	4.00
	4	3.50
25	5 & Over	3.50
30		2.90
35		1.50
40		0.60
45		0.50
50		0.50
55		0.50
60		0.50

Rates of disability were as follows:

Sample Ages	% of Active Members Becoming Disabled within Next Year	
	Men	Women
20	0.08%	0.10%
25	0.08%	0.10%
30	0.08%	0.10%
35	0.08%	0.10%
40	0.20%	0.36%
45	0.27%	0.41%
50	0.49%	0.57%
55	0.89%	0.77%
60	1.41%	1.02%

For purposes of the valuation we assume that 75% of disabilities are duty related and 25% of disabilities are non-duty related.

MISCELLANEOUS AND TECHNICAL ASSUMPTIONS

JUNE 30, 2016

Marriage Assumption:	100% of males and 100% of females are assumed to be married for purposes of death-in-service benefits. Male spouses are assumed to be three years older than female spouses.
Pay Increase Timing:	Middle of the valuation year.
Decrement Timing:	Decrements of all types are assumed to occur mid-year.
Eligibility Testing:	Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
Decrement Relativity:	Decrement rates are used directly from the experience study, without adjustment for multiple decrement table effects.
Decrement Operation:	All decrements the first five years of service. Only mortality operates during retirement eligibility.
Service Credit Accruals:	It is assumed that members accrue one year of service credit per year.
Incidence of Contributions:	Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.
Normal Form of Benefit:	A 60% automatic joint and survivor payment is the assumed normal form of benefit for married people.
Benefit Service:	Exact fractional service is used to determine the amount of benefit payable.
Payroll Adjustment:	Members who did not work the entire plan year had pays adjusted to reasonably reflect a full year's pay.

GLOSSARY

Accrued Service. The service credited under the plan which was rendered before the date of the actuarial valuation.

Actuarial Accrued Liability. The difference between (i) the actuarial present value of future plan benefits, and (ii) the actuarial present value of future normal cost. Sometimes referred to as "accrued liability" or "past service liability."

Actuarial Assumptions. Estimates of future plan experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and salary increases. Decrement assumptions (rates of mortality, disability, turnover and retirement) are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (salary increases and investment income) consist of an underlying rate in an inflation-free environment plus a provision for a long-term average rate of inflation.

Actuarial Cost Method. A mathematical budgeting procedure for allocating the dollar amount of the "actuarial present value of future plan benefits" between the actuarial present value of future normal cost and the actuarial accrued liability. Sometimes referred to as the "actuarial funding method."

Actuarial Equivalent. A single amount or series of amounts of equal value to another single amount or series of amounts, computed on the basis of the rate(s) of interest and mortality tables used by the plan.

Actuarial Present Value. The amount of funds presently required to provide a payment or series of payments in the future. It is determined by discounting the future payments at a predetermined rate of interest, taking into account the probability of payment.

Amortization. Paying off an interest-bearing liability by means of periodic payments of interest and principal, as opposed to paying it off with a lump sum payment.

Experience Gain (Loss). A measure of the difference between actual experience and that expected based upon a set of actuarial assumptions during the period between two actuarial valuation dates, in accordance with the actuarial cost method being used.

GLOSSARY

Funding Value of Assets. The value of assets derived by spreading the capital value changes (unrealized and realized gains and losses) in equal dollar installments over four years. This treatment removes the timing of investment activities from the valuation process.

Normal Cost. The annual cost assigned, under the actuarial funding method, to current and subsequent plan years. Sometimes referred to as “current service cost.” Any payment toward the unfunded actuarial accrued liability is not part of the normal cost.

Reserve Account. An account used to indicate that funds have been set aside for a specific purpose and are not generally available for other uses.

Unfunded Actuarial Accrued Liability. The difference between the actuarial accrued liability and valuation assets. Sometimes referred to as “unfunded accrued liability.”

Valuation Assets. The value of current plan assets recognized for valuation purposes.

SECTION D

FINANCIAL REPORTING

NOTE: GASB Statements No. 67 and No. 68 are effective for Governmental Retirement Plans for the fiscal year beginning after June 15, 2013 (GASB Statement No. 67) and the fiscal year beginning after June 15, 2014 (GASB Statement No. 68). These statements replace GASB Statements No. 25 and No. 27.

Retirement System amended.

* Revised actuarial assumptions and/or methods.

** Includes Funding Reserve transfer of \$1,081,261 (formerly included in FY 2010).

SUPPLEMENTARY INFORMATION

The information presented in the supplementary schedules was determined as part of the actuarial valuation at the dates indicated. Additional information as of the latest actuarial valuation follows.

Valuation date	June 30, 2016
Actuarial cost method	Entry Age
Amortization method	Level percent closed
Remaining amortization period	10 years if overfunded 23 years if underfunded
Asset valuation method	5-year smoothed market
Actuarial assumptions:	
Investment rate of return	7.5
Projected salary increases*	4.5% - 7.5%
*Includes inflation at	4.5
Cost-of-living adjustments (Compounded)	
All Fire (effective 7/1/94), Police (effective 7/1/95), Police Command (effective 7/1/96), Police AR4 (effective 7/1/96)	5% cost-of-living increases at age 60 or 5 years after retirement, second increase of 5% five years after the first increase.
Fire (effective 7/1/00), Police (effective 7/1/01)	5% cost-of-living increases at age 60 or 5 years after retirement, second increase of 5% five years after the first increase. A third increase of 5% five years after the second increase.
Police Command (effective 7/1/00), Police AR4 (effective 7/1/00), Fire AR4 (effective 7/1/00)	2.5% cost-of-living increases at age 60 or 3 years after retirement, second increase of 5% two years after the first increase. A third increase of 2.5% two years after the second increase. A fourth increase of 5% three years after the third increase.
Fire AR4, Police AR4, and Police Command (effective 3/19/07), Police (effective 4/7/08), Fire (effective 7/1/08)	2.5% cost-of-living increases at age 60 or 3 years after retirement, second increase of 2.5% two years after the first increase. A third increase of 2.5% two years after the second increase. A fourth increase of 2.5% three years after the third increase. A fifth increase of 2.5% two years after the fourth increase. A sixth increase of 2.5% three years after the fifth increase.

REQUIRED SUPPLEMENTARY INFORMATION (CONCLUDED)

Membership of the plan consisted of the following at June 30, 2016, the date of the latest actuarial valuation:

Retirees and beneficiaries receiving benefits	204
Terminated plan members entitled to but not yet receiving benefits	2
Active plan members	<u>130</u>
Total	336

APPENDIX I

July 1, 2039	1	9,605,547	31.59%	9,957,073	351,526	-

Unfunded liability at June 30, 2016 adjusted to July 1, 2017 with payments expected to be made between the valuation date and July 1, 2017. Payment based on 7.50% interest and 4.5% wage base over 23 years beginning on the Fiscal Year starting July 1, 2017.

APPENDIX II

CITY OF ST. CLAIR SHORES
POLICE AND FIRE RETIREMENT SYSTEM
ACTUARIAL FUNDING POLICY

(As adopted 10-29-2015)

WHEREAS, the City of St. Clair Shores Police and Fire Retirement System (“Retirement System”) is established and administered pursuant to the provisions of Public Act 345 of 1937, as amended, applicable collective bargaining agreements, and applicable state and federal laws including, but not limited to Public Act 314 of 1965, as amended (“Act 314”) [MCL 38.1132 *et seq.*], and

WHEREAS, the Board of Trustees of the Retirement System (“Board”) is vested with the authority and fiduciary responsibility for the administration, management and operation of the Retirement System, and

WHEREAS, the Board, in consultation with its Actuary, has an obligation to establish the economic and demographic assumptions to be utilized in performing the required actuarial valuation of the Retirement System and in determining the required annual employer contribution to the Retirement System, and

WHEREAS, the Board is aware of upcoming changes to the accounting and reporting standards approved by the Governmental Accounting Standards Board (GASB) for public pension plans, and

WHEREAS, the Board wishes to establish a formal Actuarial Funding Policy addressing the funding objectives and actuarial assumptions to be utilized in determining the funding status of the Retirement System, therefore be it

RESOLVED, that the Board hereby adopts the following Actuarial Funding Policy:

I. GENERAL

A. Purpose

- (1) In light of upcoming changes to the GASB financial accounting and reporting standards for public pension plans, the Board of Trustees of the Retirement System desires to establish a formal Actuarial Funding Policy to ensure the systematic funding of future pension obligations of the Retirement System.

B. Policy Objectives

- (1) Maintain adequate levels of assets sufficient to fund all benefits expected to be paid to members and beneficiaries when due.
- (2) Maintain stability of employer contributions rates, consistent with other funding objectives.
- (3) Support the public policy goals of accountability and transparency.
- (4) Monitor material risks to assist in any risk management strategies the Board deems appropriate.
- (5) Promote intergenerational equity. Each generation of members and employers should incur the cost of benefits for the employees who provide services to them, rather than deferring costs to future members and employers.

CITY OF ST. CLAIR SHORES
POLICE AND FIRE RETIREMENT SYSTEM
ACTUARIAL FUNDING POLICY

(As adopted 10-29-2015)

- (6) Provide a reasonable margin for adverse experience to offset risk.
- (7) Review the Plan's investment return assumption, potentially in conjunction with a periodic asset liability study and in consideration of the Board's risk profile.
- (8) Continue the systematic reduction of the Plan's Unfunded Actuarial Accrued Liabilities (UAAL).

II. LEGAL

A. Annual Actuarial Valuation

- (1) Section 20h(4) of Act 314 [MCL 38.1140h(4)], requires the Retirement System to have an actuarial valuation performed annually as follows:

Except as otherwise provided in this subsection, a system shall have an annual actuarial valuation with assets valued on a market-related basis. The actuarial present value of total projected benefits shall include all pension benefits to be provided by the system to members or beneficiaries pursuant to the terms of the system and any additional statutory or contractual agreements to provide pension benefits through the system that are in force at the actuarial valuation date, including, but not limited to, service credits purchased by members, deferred retirement option plans, early retirement programs, and postretirement adjustment programs. A system that has less than \$20,000,000.00 is only required to have an actuarial valuation as required under this subsection done every other year.

B. Annual Employer Contribution

- (1) The Board is required, pursuant to Section 20m of Act 314 [MCL 38.1140m], to annually certify the annual required contribution to be made by the employer as follows:

The governing board vested with the general administration, management, and operation of a system or other decision-making body that is responsible for implementation and supervision of any system shall confirm in the annual actuarial valuation required under section 20h and the summary annual report required under section 13 that each system under this act provides for the payment of the required employer contribution as provided in this section and shall confirm in the summary annual report that the system has received the required employer contribution for the year covered in the summary annual report. The required employer contribution is the actuarially determined contribution amount. An annual required employer contribution in a system under this act shall consist of a current service cost payment and a payment of at least the annual accrued amortized interest on any unfunded actuarial liability and the payment of the annual accrued amortized portion of the unfunded principal liability. For fiscal years that begin before January 1,

CITY OF ST. CLAIR SHORES
POLICE AND FIRE RETIREMENT SYSTEM
ACTUARIAL FUNDING POLICY

(As adopted 10-29-2015)

2006, the required employer contribution shall not be determined using an amortization period greater than 40 years. Except as otherwise provided in this section, for fiscal years that begin after December 31, 2005, the required employer contribution shall not be determined using an amortization period greater than 30 years. In a plan year, any current service cost payment may be offset by a credit for amortization of accrued assts, if any, in excess of actuarial accrued liability. A required employer contribution for a system administered under this act shall allocate the actuarial present value of future plan benefits between the current service costs to be paid in the future and the actuarial accrued liability. The governing board vested with the general administration, management, and operation of a system or other decision-making body that is responsible for implementation and supervision of a system shall act upon the recommendation of an actuary and the board and the actuary shall take into account the standards of practice of the actuarial standards board of the American academy of actuaries in making the determination of the required employer contribution.

III. POLICY

A. Actuarial Cost Method

- (1) The individual entry age normal actuarial cost method of valuation shall be utilized in determining actuarial accrued liability and normal cost with the following characteristics:
 - (a) the annual normal costs for each individual active member, payable from the date of employment to the date of retirement, are sufficient to accumulate the value of the member's benefit at the time of retirement; and
 - (b) each annual normal cost is a constant percentage of the member's year-by-year projected covered pay.
- (2) Differences in the past between assumed experience and actual experience (actuarial gains and losses) shall be factored into the actuarial accrued liability.
- (3) The normal cost shall be determined on an individual basis for each active member.

B. Asset Smoothing Method

- (1) The investment gains or losses of each valuation period, resulting from the difference between actual investment return and assumed investment return, shall be recognized annually in level amounts over a period determined by the Board in consultation with its actuary, not to exceed five (5) years in calculating the funding value of assets.

C. Amortization Method

- (1) A level percent of payroll amortization method shall be used to systematically pay off the unfunded actuarial accrued liabilities over a closed amortization period not to exceed 30 years.
- (2) Unfunded liabilities associated with benefit changes or assumption changes shall be funded over a period to be determined by the Board in consultation with its actuary.

CITY OF ST. CLAIR SHORES
POLICE AND FIRE RETIREMENT SYSTEM
ACTUARIAL FUNDING POLICY

(As adopted 10-29-2015)

- (3) Unfunded liabilities arising from benefit changes provided to retirees or in conjunction with early retirement incentive programs offered by the employer shall be separately funded over a period to be determined by the Board in consultation with its actuary.
- (4) In the event that the Retirement System's assets exceed its liabilities, all amortization schedules other than those related to benefit changes for retirees or early retirement incentive programs offered by the employer shall be considered completed, and employer contributions will be set based upon the normal cost and the completion of any remaining amortizations due to benefit changes for retirees or early retirement incentive programs offered by the employer, without regard to the overfunding status of the Retirement System.

D. Assumptions

- (1) The economic and demographic actuarial assumptions utilized to determine the contribution requirements and benefit values of the Retirement System shall be determined by the Board in consultation with its actuary, subject to the following limitations:
 - (a) The assumed rate of investment return shall not exceed 8.0%, compounded annually.

E. Funding Target

- (1) The targeted funded ratio of the Retirement System shall be 100%.
- (2) The employer contribution rate shall at least be equal to the normal cost unless the funded ratio of the Retirement System exceeds 120%.
- (3) A funding plan shall be developed by the Board in consultation with its actuary if the funded ratio of the Retirement System falls below 50%, which may include additional funding requirements.

F. Risk Management

- (1) Assumption Changes
 - (a) The actuarial assumptions utilized to determine the annual contribution requirements and valuations shall be those last adopted by the Board based on the most recent experience study and upon the advice and recommendation of the Board's actuary. The Board's actuary shall conduct an experience study at least once every five years. The results of the experience study shall be the basis for the actuarial assumptions recommended to the Board.
 - (b) The actuarial assumptions may be revised during the five-year period between experience studies if significant plan design changes or other significant events occur, as advised by the actuary.
- (2) Risk Measures. The following risk measures will be annually determined by the Retirement System's actuary to provide quantifiable measurements of risk as it applies to the Retirement System.
 - (a) Funded ratio;
 - (b) Unfunded actuarial accrued liabilities – the years required to pay down the unfunded liabilities of the Retirement System based upon the current funding schedule;

CITY OF ST. CLAIR SHORES
POLICE AND FIRE RETIREMENT SYSTEM
ACTUARIAL FUNDING POLICY

(As adopted 10-29-2015)

- (c) Total unfunded actuarial accrued liabilities as a percentage of total payroll;
 - (d) Total assets as a percentage of total payroll; and
 - (e) Total actuarial accrued liabilities as a percentage of total payroll.
- (3) Risk Control
- (a) The Board shall carefully monitor the risk measures identified above and shall consider steps to mitigate risk, particularly as the funded ratio increases.

IV. REVIEW AND AMENDMENT

A. Periodic Review

- (1) This Actuarial Funding Policy shall be reviewed no less frequently than once every five years in conjunction with the required experience study performed by the Board's actuary, and may be reviewed at any time in the Board's discretion.

B. Amendment

- (1) The Board, in consultation with its Actuary and Legal Counsel, may amend this Actuarial Funding Policy at any time as deemed necessary to address changes in the makeup, benefit structure and/or funding status of the Retirement System.

October 31, 2016

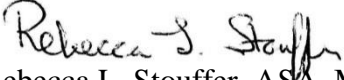

Secretary of the Retirement Board
City of St. Clair Shores Police
and Fire Retirement System
27600 Jefferson Circle Drive
St. Clair Shores, Michigan 48081-9971

Re: 67th Annual Actuarial Valuation

Dear Board Members:

Please find enclosed 25 copies of the 67th Annual Actuarial Valuation report for the City of St. Clair Shores Police and Fire Retirement System.

Sincerely,

Rebecca L. Stouffer, ASA, MAAA
